

Delivering term maintenance contracts to the Local Authority market

Stockport and Trafford Alliance

We have a comprehensive highways and civil engineering capability enabling us to deliver any type of term maintenance contract. Our services include the design, build, refurbish and maintenance on every type of road scheme; including motorways, trunk roads, minor roads, footways and town centre improvements.

Contract Details

We undertake works ranging from small £500,000 per-year resurfacing contracts to £25m per-year PFI contracts through which we provide complete highways maintenance service.

We have recognised the importance of sustainability in our highway activities long before it became an imperative. For a number of years we have promoted in-situ road recycling techniques and cold emulsion binders to reduce the environmental impact, and safety risks, of maintaining footways and carriageways.

We are able to undertake projects the length and breadth of the country, we are currently delivering term maintenance contracts for local authorities throughout the UK.

Colas secured the major Alliance framework tender with Stockport and Trafford Metropolitan Borough Councils in 2009 for surface treatments and processes. The contract is a five year contract with a further five year extension.

Over the duration of the contract, Surface Dressing, Slurry Sealing and Retread are some of the treatments that will be applied to provide Stockport and Trafford durable and sustainable surface treatments.
