

Sustainable Solutions

For the hole reinstatement

Colas – The Hole Reinstatement Package

To help contractors, utilities and DLOs minimise time spent on reinstatements, Colas has put together a package of quality products for such work, enabling all the necessary materials to be obtained from just one supplier – and what's more, a supplier with a network of depots throughout the UK.

Jointgrip OB

Anti-skid overbanding sealant providing toughness, flexibility, adhesiveness and resistance to flow.

Will act as a waterproofing sealant for horizontal joints, cracks in concrete, asphaltic roads and airfield surfaces. Where extra protection is required beyond the edges of such joints or cracks – 25kg 4ply sacks, 10kg cartons.

RS Bitukold Spray

Rapid setting, cold applied sealant for vertical joints. The cationic formulation of RS Bitukold spray ensures a rapid set even in cold, damp conditions - 600ml aerosol cans.

H4

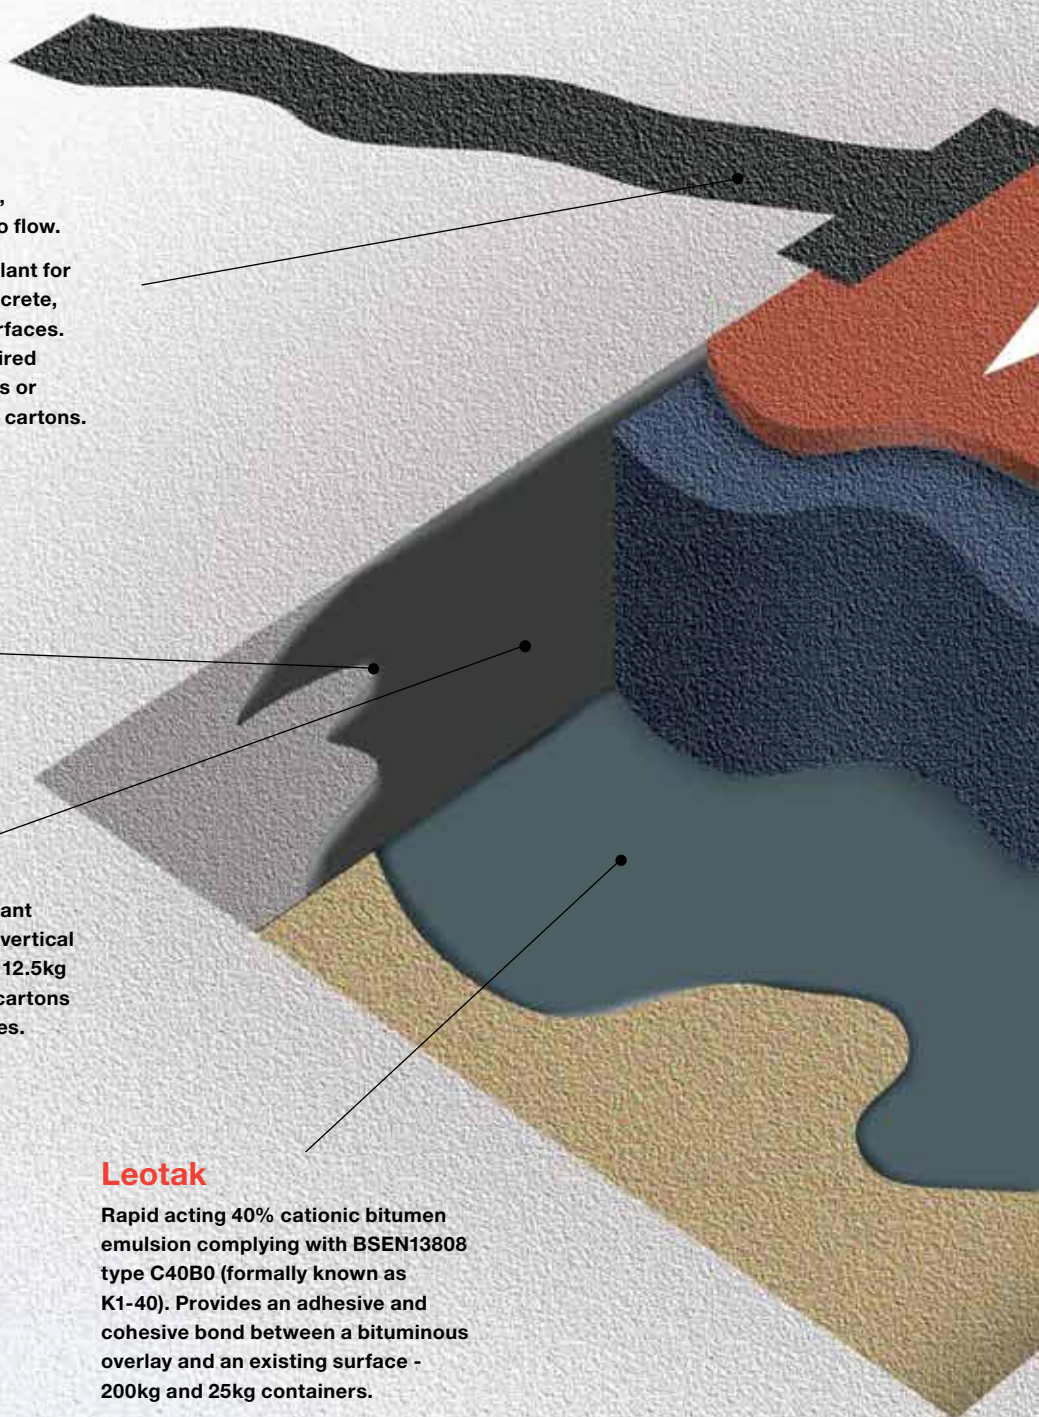

A hot poured, bitumen joint sealant specially formulated to seal the vertical faces of horizontal pavements - 12.5kg and 25kg siliconised easy strip cartons and 25kg metal pails with handles.

Leoclean

A range of exceptionally safe, heavy duty cleaners and degreasers formulated from orange and environmentally friendly oils. Supplied in 500ml trigger bottles, 5ltr, 25ltr and 200ltr containers.

Leotak

Rapid acting 40% cationic bitumen emulsion complying with BSEN13808 type C40B0 (formally known as K1-40). Provides an adhesive and cohesive bond between a bituminous overlay and an existing surface - 200kg and 25kg containers.

Premark Preformed Thermoplastic Markings

High quality thermoplastic specifically designed for permanent markings on roads, highways, car parks and playgrounds.

This material is not dependent on the road temperature and can be applied at any time during the year. All symbols and designs are individually packed and ready for use. Also available as Anti-Skid Overband - please ask for details.

Colasgrip

High performance non toxic pigmentable anti-skid surface. Ideal for covering reinstatements in a colour to match the surrounding area - 5m² and 16m² handipacks.

Colpatch

Cold applied storage grade macadam ideal for instant, high quality, long lasting repairs to bituminous or concrete surfaces - 20kg buckets, 25kg bags, 1 tonne bags or bulk. BBA HAPAS approved as a permanent patch repair material.

Bitucrete

Cold applied, deferred set, storage grade macadam ideal for instant, high quality repairs to concrete or bituminous surfaces - 25kg bags or bulk. (BBA HAPAS approved for use in footways, footpaths and cycleways).

Bitukold / RS Bitukold

A range of cold applied thixotropic bitumen compounds designed for sealing vertical joints. Ideal for patch repairs, trench reinstatements, drain or manhole frames and kerb channels - 15kg plastic buckets with lids and handles or 10kg plastic bags.

Polykold

Rapid setting cold applied thixotropic polymer modified bitumen emulsion designed for sealing vertical joints. Ideal for transverse or longitudinal joints, patch repairs, trench reinstatements, drain or manhole frames and kerb channels - 15kg plastic buckets with lids and handles.
